DETAILED ACTION

Receipt is acknowledged of the information disclosure statements filed
07/20/2005, 09/10/2005 ,01/15/2007, 10/02/2009.

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-10 in the reply filed on
07/24/2009 is acknowledged.

Claims 11-25 are withdrawn from further consideration pursuant to 37 CFR
1.142(b) as being drawn to a nonelected invention, there being no allowable generic or
linking claim. Election was made **without** traverse in the reply filed on 07/24/2009.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 1615

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25, 52-59 of U.S. Patent No. 7,445,792 (US'792). Although the conflicting claims are not identical, they are not patentably distinct from each other because '92 sets out a device, which may be a stent (see claims 1 and 24) wherein a beneficial agent and a hydration inhibitor are included and the Log P of the hydration inhibitor is greater than the Log P of the beneficial agent. The beneficial agent may be dipyridamole (see claim 3). Everolimus is set out in claims 59. While claim 10 sets out a third beneficial agent, the inclusion of dypiridamole has already been suggested by US'792, so additional amounts do not change the basic teaching by that patent to include this compound as a beneficial agent. Therefore, those of ordinary skill would have been able to select everolimus as a hydrating agent because of its larger Log P value, with the expectation of similar therapeutic effects given the teachings of US'792. As such, the instant claims would have been obvious to one of ordinary skill in the art at the time of invention given the claims of US'792.

Rowan et al is cited as patent of interest in its disclosure of implant coatings.

Conclusion

Art Unit: 1615

Cancellation of the non-elected claims and filing of a terminal disclaimer would place the instant application in condition for allowance.
